INVITIATION FOR BID (IFB)

ADDENDUM #4

Clarification –

Question:

“The bid states (page 2) “Pricing shall include all specified products, freight, delivery, installation, clean up and removal of packaging materials from the project site.”

The bid tabulation form has separate lines for: Freight and Installation.

Can we just include our freight and installation charges in the unit price of the products, since the bid previously states that those items shall be included?”

Response:

Freight should be listed on the tabulation form if it is not included in the cost of the item.

Installation should be listed separately on the tabulation form. Installation would include “delivery, installation, clean up and removal of packaging materials from the project site”.
